TO WHOM IT MAY CONCERN

Gazi Adnan Latif was my student in A.Y. 2020-21 for the course on Database Systems, of which I am the responsible lecturer for the Bachelor program in Computer Science at University of Padua.

Due to the COVID-19 pandemics, the course was largely taught without physical attendance, and thus I have not personally interacted with Gazi Adnan Latif.

However, looking at the course marks, I can state that Gazi Adnan Latif obtained the maximum possible grade of 30/30 “cum laude”, which I gave to four out of the 129 students who attempted the exam: namely, he has been in the top 3.1% of my course for A.Y. 20-21.

Padua, 14 February 2022
