Recommendation letter for Adnan Latif Gazi

I have known Adnan Latif Gazi as a student of my course “Data Structures and Algorithms” (undergraduate program in Computer Science). Our interactions were limited to this course, but still they gave me the opportunity to appreciate Adnan Latif’s intellectual ability, his curiosity and his desire of understanding. In my exam, he was among the best students (top 10% out of 110 students in 2021) and, more generally, his overall performance for the exams he has passed so far is neatly above the average (GPA 28/30).

It is thus a pleasure for me to support Adnan Latif’s application for the Fellowship Programme at CERN.

PADOVA, FEBRUARY 14, 2022
